

Community Emergency Preparedness Training

This training is provided
FREE of Charge
and is presented by
Daisy Mountain Fire Dept.

CERT training promotes a partnership between local emergency service organizations and the people and communities they serve. The goal is for emergency personnel to train members of neighborhoods, community organizations, and workplaces in basic emergency response skills. CERT members are then integrated into the emergency response capability for their area.

If a disastrous event should overwhelm or delay the community's professional response, CERT members can assist their families, then others by applying the basic response and organizational skills they learned during training. These skills can help save and sustain lives following a disaster until help arrives.

Presented by
