

Prepare Your Property for Monsoons

Free Sand and Sandbags Available at Daisy Mountain Fire Stations 141, 143 and 146!

Monsoon storms don't always follow the calendar. While the season officially begins on June 15th and ends September 30th, we can experience these storms throughout the summer. Arizona monsoon storms vary in intensity, but usually involve wind, blowing dust, and rain. Sometimes the thunderstorms are brutal, delivering damaging wind, reducing visibility to near zero, then torrential rain, followed by flash flooding. The most severe storms usually occur from the middle of July through the middle of August. Portions of Anthem, Black Canyon and New River have been severely impacted from rainstorms, and the flooding that resulted.

If you're concerned with flooding, prepare your property ahead of time. Daisy Mountain Fire Department has free sand and sandbags at Fire Stations 141 (43814 N New River Rd, New River, AZ 85087); 143 (35050 Old Black Canyon Hwy, Black Canyon City, AZ 85324) and 146 (3116 W New River Rd, New River, AZ 85087). If possible, please visit during normal business hours. Be patient, if no one is at the station, our crews may be out helping others in the community. For tips on using sand bags, visit <http://1.usa.gov/1tXVeCq>
